EECE.2160: ECE Application Programming
Fall 2016

Lecture 34: Key Questions
December 7, 2016

1. Explain the use of the `fopen()` function.

2. Explain the use of the `fclose()` function.

3. Explain how `fscanf()` and `fprintf()` are used for formatted file I/O.

4. **Example:** Write a program to:
    *   Read three integers from file `myinput.txt`
    *   Determine the sum and average of those values
    *   Write the original values, sum, and average to file `myoutput.txt`.

5. Explain how `fread()` and `fwrite()` are used for unformatted I/O.
