EECE.2160: ECE Application Programming Fall 2017

Lecture 8: Key Questions September 22, 2017

1. Discuss how to use if statements to check that a value falls within a desired range.

Lecture 8: Key Questions

- 2. **Example:** Write a short code sequence that does each of the following:
- a. Given int x, check its value. If x is more than 5 and less than or equal to 10, print x

b. Prompt for and read temperature as input (type double). If temp is 90 or higher, print "It's too hot!" If temp is 32 or lower, print "It's freezing!" In all other cases, print "It's okay"

- c. Read 3 int values and print error if input problem
 - If fewer than 3 values read, print error message with number of values
 - Example: Error: only 2 inputs read correctly
