EECE.2160: ECE Application Programming
Spring 2017

Lecture 33: Key Questions
April 19, 2017

1. Explain the use of the `fopen()` function.

2. Explain the use of the `fclose()` function.

3. Explain how `fscanf()` and `fprintf()` are used for formatted file I/O.

4. **<u>Example:</u>** Write a program to:
   - Read three integers from file `myinput.txt`
   - Determine the sum and average of those values
   - Write the original values, sum, and average to file `myoutput.txt.`

5. Explain how `fread()` and `fwrite()` are used for unformatted I/O.
