EECE.2160: ECE Application Programming Spring 2018

Lecture 21: Key Questions March 23, 2018

1. Explain how to pass arrays to functions.

EECE.2160: ECE Application Programming Spring 2018

- 2. **Example:** Write a function for each of the following:
- Given an array of doubles (arr) and the # of elements in the array (n), find the average of all array elements

• Given an array of ints and the # of elements, find the largest element in the array

EECE.2160: ECE Application Programming Spring 2018

3. Explain the relationship between arrays and pointers and the implications for passing arrays as function arguments.
