

# **EECE.2160: ECE Application Programming**

Spring 2018

## Lecture 29: Key Questions

April 18, 2018

1. Describe the functions used for character I/O.

2. Describe the functions used for line I/O

3. **Example:** Show the output of each of the following short program.

a. **Input: Test Input      1      23 4 5**

```
void main() {
    char c;
    char buffer[50];
    int i, n;
    i = 0;
    while ((c = fgetc(stdin)) != '\n') {
        if (c != ' ') {
            buffer[i++] = c;
        }
    }
    buffer[i] = '\0';
    fputs(buffer, stdout);
}
```

b. Input:

**Test1**

**Test 2**

**abcdefghijklmnopqrstuvwxy**

**This is a test of the fgets() function**

```
void main() {  
    char str[25];  
    int i;  
    for (i = 0; i < 5; i++) {  
        fgets(str, 24, stdin);  
        strcat(str, "\n");  
        fputs(str, stdout);  
    }  
}
```

c. Input:

**1024Some other stuff**

```
void main() {
    char c;
    char buffer[50];
    int n = 0;

    // isdigit in <ctype.h>
    while (isdigit(c = getchar())) {
        n = n * 10 + (c - 48);    // Hint: '0' = 48    }
        // (ASCII value)
    ungetc(c, stdin);
    fgets(buffer, 50, stdin);

    printf("n = %d, n * 2 = %d\n", n, n * 2);
    printf("buffer = %s\n", buffer);
}
```
