The following two pages contain tables listing the PIC 16F1829 instruction set. You do not need to submit these pages with your exam.

Remember that, in the table below:

- f = a register file address
- W = the working register
- d = destination select: "F" for a file register, "W" for the working register
- b = bit position within an 8-bit file register
- k = literal field, constant data or label
- PC = the program counter
- C = the carry bit in the status register
- Z = the zero bit in the status register
