The following pages contain references for use during the exam: tables containing the PIC 16F684 instruction set and memory map, as well as a block diagram of the microcontroller. You may detach these sheets from the exam and do not need to submit them when you finish.

Remember that, in the table below:

- f = a register file address
- W = the working register
- d = destination select: “F” for a file register, “W” for the working register
- b = bit position within an 8-bit file register
- k = literal field, constant data or label
- PC = the program counter
- C = the carry bit in the status register
- Z = the zero bit in the status register
